A Safer Community

Smart communities work with police to decrease crime and increase safety. Your local law enforcement can teach you how to look out for each other, protect property from theft or damage, and make your community a safer place for everyone (except criminals).

Stolen Property

Computrace® LoJack® for Laptops by Absolute® Software is an important tool in your fight against crime. If Computrace LoJack for Laptops is installed and activated on your computer – and your computer is lost or stolen – we will use our technology to pinpoint the physical location of your computer, working closely with local law enforcement to help recover your property.

Identity Theft

With Computrace LoJack for Laptops, you can protect your privacy by remotely deleting all files from your computer, including files and applications containing personal photos, Internet bookmarks, browser cookies, financial information, and stored passwords. Everything an identity thief would need to steal your identity.

“My son and I are extremely grateful to Absolute Software for the return of the new laptop. Computrace LoJack for Laptops works even in other countries! I recommend it to everyone I speak to, especially students. Thank you Absolute Software.”

Steve Kinard Sr.
(father of Texas A&M student and grateful LoJack customer)

Lojack for Laptops – How it Works

Our technology is based on our patented Computrace® Agent. Through our partnership with leading computer manufacturers, our Agent was probably embedded in your computer at the factory. Or you can easily install it yourself.

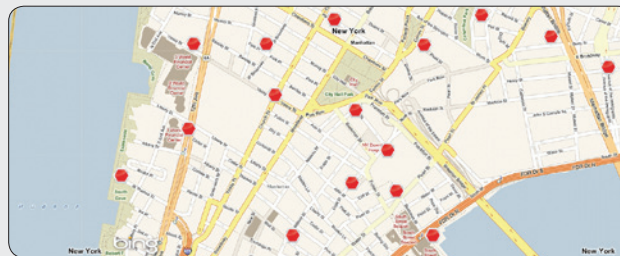

Our embedded Agent is incredibly persistent and allows your computer to maintain a connection with our Monitoring Center, even if the hard drive is completely reformatted or replaced. Once the Agent is activated – your computer (and everything on it) is protected.

Available services and features include:

- Theft Recovery
- Remote Data Delete
- \$1000 Service Guarantee - Conditions apply, visit www.lojackforlaptops.com/service_agreement for more details.

Tracking Your Stolen Computer

In the event of theft, contact us. The next time your computer connects to the internet, our Theft Recovery Team will forensically mine your computer using a variety of procedures including key captures, registry and file scanning, geolocation, and other investigative techniques to determine who has your computer.

Most importantly, we will use our technology to pinpoint the physical location of your computer and work closely with police to recover your property.

Theft Recovery Team

The Absolute Theft Recovery Team helps to return thousands of computers to their rightful owners each year. Our team is staffed by former police officers and seasoned law enforcement professionals who have worked hard to build positive relationships with police and security agencies around the world. Knowing how law enforcement works has helped Absolute Software achieve the highest recovery rate in the industry.

Teamwork

Since our background is in law enforcement, we know exactly what police officers need to carry out a successful investigation. Using our technology, we collect information and do all the paperwork – providing it to investigating officers so it can easily be used as evidence in their efforts to obtain subpoenas, search warrants, and other tools they need to solve the crime and recover your property.

What's Your Digital Net Worth?

Think about it. How much did your computer cost? How many hours will you invest in term papers, homework, and study material? And how many songs, movies, and other irreplaceable items would you lose if your computer was stolen?

Computer theft can happen anywhere. Here are the statistics as reported by our customers:

- | | |
|------------------|------------------------|
| 1. Residence | 7. Hotel |
| 2. Vehicle | 8. Unknown location |
| 3. Dorm | 9. Outside the country |
| 4. Office | 10. On public transit |
| 5. School | 11. Store |
| 6. Airport | 12. During a mugging |

With Computrace LoJack for Laptops, you can join the thousands of Absolute Software customers who have protected and recovered their property. This is the best statistic of all!
